Rockville, MD 20857

Dear Commissioner Henney,

The practice of routinely feeding antibiotics to cattle, hogs, and poultry needs to be banned immediately! Bacteria that can harm people are becoming more and more immune to antibiotics, partly because of this practice. It is scary to think that if we become ill an antibiotic that might have helped us has become useless because of livestock producers' greedy and irresponsible practices.

Please ban the use of antibiotics from animal feed.

Sincerely,

Scott Schneider

Sylvia Schneider
